

# SGS

## Gravity Selector Drystoner

Machine designed to divide the lightweight wheat fraction from the heavy one, separating it from rocks and other heavyweight materials, partially removing powder and light impurities. The SGS features both a gravity selector and a drystoner. It is equipped with two stacked decks, easily removable and inserted in a vacuum chamber.

Model	Capacity t/h	Aspiration m <sup>3</sup> /min	Neg. Pressure mmH <sub>2</sub> O	Vibrating motors Kw - 50Hz	Weight Kg	Volume m <sup>3</sup>
